## **BIOGRAPHICAL SKETCH**

Robert A. Frederick was born June 3, 1924 in Indianapolis. Mr. Frederick was a life-long employee of the Pennsylvania Railroad. According to an article in the collection featuring Frederick, he was a Pennsylvania Railroad engineer and began working on the railroad about 1942. The article also stated that he was an avid model railroader.

Frederick photographed trains and also purchased photographs from others. He acquired many images of Pennsylvania Railroad property; which at the time was the largest (by traffic and revenue) railroad in the U.S.A.

The Polk City Directories list him as an engineer for the Pennsylvania Railroad in 1964 and 1965. These same directories also list him as residing at the same address on the southeast side of Metropolitan Indianapolis in 1997.

## **SCOPE AND CONTENT NOTE**

This collection of color and black & white railroad photographs is the result of years of collecting by Robert A. Frederick of Indianapolis. There are approximately 9,000 images ranging in size between 3x5 inch and 4x6 inch with some odd sized photos stored in OVA size folders. The collection is comprised of original and copy photographs of cars and locomotives from railroad companies in the United States and some international as well.

The Pennsylvania Railroad has the strongest photographic presence in the collection, as this was Mr. Frederick's employer. Indiana's Monon Railroad, and Nickel Plate railroads are also represented. Railroads from Central American, Southeast Asia, Germany, and the United Kingdom are also in this collection, though in smaller numbers.

Frederick stamped his name and address on the verso of many photographs. The collection contains new copies of old photographs and images taken by other photographers with their stamps and names also noted on the verso. Most photographs list the railroad name, date, where the image was taken, and technical information.

The collection has been maintained in Frederick's original alphabetical order. Each railroad is listed in the collection guide with brief descriptions of the images and a count of the prints. The photographs are stored in archival boxes with railroad names noted on divider cards.
